

INVESTMENT PROJECT TO ORGANIZE SHUTTLE FINAL HUB IN YEREVAN

Project Description

The organization of shuttle final hub aims to establish an intercity bus parking zone, as well as a parking zone for cargo transportations, main and temporary stops for transportation entering Yerevan, repair, cleaning and refueling stations and to create favorable conditions for drivers and passengers to organize their temporary rest and food intake.

The project implementation will create an opportunity to reduce the flow of vehicles entering the city, in case the public transport is used from the final hub, as well as to reduce the transit traffic flow through the city from other parts of the settlements and subways. The project implementation will contribute to the improvement of the ecological situation in the capital.
